**NL** Werken met zulke mooie producten zoals tulpen, narcissen, crocussen en vele andere prachtige bloembollensoorten geeft een soort kick. Onze bloembollen worden door ons inmiddels de hele wereld over gestuurd. Mooi idee dat wij bijdragen aan het feit dat er op zoveel plaatsen in de wereld iets groeit en bloeit dat mensen gelukkig maakt. Het maakt de mensen blij en ze genieten ervan. Dat is dat belangrijke deel van mijn werk wat het allemaal zo leuk maakt.

**EN** Working with beautiful products such as tulips, daffodils, crocuses and many other bulb varieties gives us a real kick! We now send bulbs all over the world. It's a wonderful thought that we can contribute to the growing and blooming of flowers across the globe and add to so many people's enjoyment. That's such an important part of my job and what makes it all so much fun.

**FR** Travailler avec de si beaux produits tels que des tulipes, des jonquilles, des crocus et de nombreuses autres belles variétés de bulbes à fleurs donne une sorte de coup de pied. Nos bulbes à fleurs sont maintenant envoyés partout dans le monde par nos soins. Belle idée que nous contribuons au fait que dans tant d'endroits dans le monde, quelque chose pousse et fleurit qui rend les gens heureux et qu'ils en profitent. C'est cette partie importante de mon travail qui rend tout cela si amusant.

**DE** Mit so schönen Produkten wie Tulpen, Narzissen, Krokussen und vielen anderen schönen Blumenzwiebelsorten zu arbeiten, gibt einen gewissen Kick. Unsere Blumenzwiebeln werden mittlerweile von uns in die ganze Welt verschickt. # All about JUB

## SINCE 1910

The knowledge and expertise that has been passed down through four generations, is the key to the success of our family business. What began in 1910 as Jac. Uittenbogaard is now an internationally operating flower bulb company, under the name JUB Holland.

Within our company, all facets of the profession are covered. This is how we distinguish ourselves from other suppliers.

## GROWING & BREEDING

More and more sustainable, PlanetProof bulbs

### Growing bulbs on our own nursery

The great thing about JUB Holland is that we are one of the few companies in the bulb sector to do everything ourselves. We grow, we breed, we trade. That also characterises our history. On 35 hectares of our own land, 35 tulip varieties and 15 daffodil varieties grow in the open air, all certified of course (MPS A and PlanetProof).

### Breeding new varieties / Remarkable

We love to pull our strengths with those of others. That's why we are part of Remarkable Tulips, a collective of seven flower bulb growers and exporters that works on the breeding and development of new tulip varieties. These bulbs are of the very best quality and have a high resistance to diseases. Breeding requires patience, but the result is more than worth it: the most stunning and most exclusive tulips.

## SUSTAINABLE SUPPLIER

From nursery to consumer

We have a strong reputation to maintain with our packaging. We work with world-renowned stylists who apply their talents to create distinctive designs. We are therefore always up to date with the very latest trends. The quality of our bulbs is our top priority. All our packaged bulbs now have the new quality mark 'Sustainable Supplier of Quality Products'.

See website: [www.sustainablesuppliers.nl](http://www.sustainablesuppliers.nl)

## WE CARE ABOUT THE ENVIRONMENT / PLANETPROOF

We are proud of our environmental certificate PlanetProof, which has been developed in collaboration with various environmental organisations. With this certificate, JUB takes a leading role within the sector. Our company is MPS-A and NL-Greenlabel certified, and was one of the first companies to have achieved the PlanetProof label. Purchasing PlanetProof flower bulbs encourages sustainable flower bulb production and protects the environment!

## LANDSCAPE

Creativity is our great strength

Greening up cities is an international trend, in which JUB Holland plays an active role (we can make a total concept). Indeed, you could even call us a trendsetter: in the 1980s we developed a planting machine which plants flower bulbs under grass at lightning speed. Our customers are local authorities, companies, gardeners and landscape architects in Europe, United States and Canada.

## BIODIVERSITY

Biodiversity is a priority for JUB. The habitats of bees and butterflies have become increasingly smaller. Many bulb flowers are attractive to butterflies and bees. That's why it is important to plant bulbs attracting bees and butterflies. See our bee and butterfly logos on the various packages.

## JUB AT KEUKENHOF 2022

Spring bulbs to enjoy

The 2022 theme is 'SILK' and the design is based on an evening gown of Queen Maxima, designed by Jan Taminiau. Main shade becomes soft lilac, through which royal blue, purple, cream and apricot tones are 'woven'.

As always it is a long flowering combination that will be different every day and will show surprising combinations.

Please follow our @JUBToday updates. To see the result yourself, visit Keukenhof: **March 24 - May 15, 2022**

# New stories

## SPECIAL CONCEPTS

Bloembollen gaan over beloftes. Uit alle soorten, maten en vormen komen na maanden wachten de mooiste voorjaarsbloemen. JUB creëert ieder jaar weer speciale concepten rond deze prachtige bloembollen.

Flower bulbs are about promises. After months of waiting, the most beautiful spring flowers come from all shapes, sizes and varieties. JUB creates special concepts around these beautiful bulbs every year.

# Bee & Butterfly stories

## Story 1, Help Nature Grow

**NL** Serie van diverse speciaal ontworpen verpakkingen met bij- en vlinderaantrekkende bollen. Deze Help Nature Grow verpakkingen zien er niet alleen mooi uit maar de inhoud creëert ook in menig tuin een fraai voorjaarsfeest met prachtig bloeiende bollen. De bollen zijn per soort verpakt.

**EN** A series of specially designed packages with bee and butterfly attracting bulbs. These packages not only look beautiful but also create a beautiful spring display in any garden. All bulb varieties are separately packaged.

## Story 2, Sweets for Insects

**NL** Deze bollen bevatten veel nectar en stuifmeel, een lekkernij voor insecten maar ook essentieel voedsel om hun weerstand op te bouwen. In het vroege voorjaar bezoeken insecten massaal naar bloeiende bollen. We denken allemaal al snel aan de bijen en de vlinders, maar ook de sluipvlieg, sluipwesp en hommels kunnen onze hulp goed gebruiken. Ook zij spelen namelijk een sleutelrol in de voedselketen dankzij hun rol als bestuiver.

**EN** These bulbs contain a great deal of nectar and pollen, a delicacy for insects, but also essential food to build up their resistance. In early spring, insects flock to flowering bulbs. We instantly think of bees and butterflies, but parasitic flies and wasps also need our help. They too play a key part in the food chain thanks to their role as pollinators.

## Story 3, Bonte Berm tas

**NL** Een tas met een bijzonder mengsel van bloembollen en zaden. Door het aanplanten van dit mengsel helpt u de diversiteit. Door de bloei van de eerste crocussen in februari/maart en de late bloei van de wilde planten en kruiden in augustus/september heeft u bijna 8 maanden bloei. Niet alleen prachtig maar ook nuttig voor de bijen, vlinders en andere insecten.

**EN** A bag with a special mixture of flower bulbs and seeds. By planting this mixture you help the diversity. Due to the flowering of the first crocus in February/March and the late flowering of the wild plants and herbs in August/September, you have almost 8 months of flowers. Not only beautiful but also useful for the bees, butterflies and other insects.

# Farmers Mix

Deze twee Farmers Mix tassen bevatten een bijzondere combinatie: een bollenmengsel + een zakje zaad voor totaal 8 maanden bloei. Bollen en zaad worden tegelijk in het najaar geplant. In het voorjaar komen eerst de bollen tot bloei terwijl het zaad ontkiemt en de bloei in de zomer overneemt.

These two Farmers Mix bags contain a special combination: a bulb mixture + a bag of seed for a total flowering time of 8 months. Bulbs and seeds are planted simultaneously in the autumn. In the spring the bulbs will flower first, while the seed germinates and prolongs the flowering time during summer.

## SPECIAAL ONTWIKKELD BLOEMBOLLENMENGSEL

In 2015 is er een onderzoek gestart naar het type bloembollen dat natuurlijke vijanden van de eikenprocessierups aantrekt. Tijdens verschillende monitoringrondes hebben wij een goed beeld gekregen welke bolsoort welk type insect aantrekt.

Uit dit onderzoek hebben wij een mengsel van verschillende type bolsoorten kunnen samenstellen dat gedurende de gehele periode erg aantrekkelijk is voor de gaasvlieg, sluipwesp en sluipvlieg. Dit zijn natuurlijke bestrijders van de eikenprocessierups. Door dit mengsel toe te passen in de buurt van eikenbomen draagt u bij aan de daling van de populatie van eikenprocessierupsen.

## SPECIALLY DEVELOPED FLOWER BULB MIX

In 2015 we launched a study into the type of flower bulbs that attract natural enemies of the Oak processionary moth. During various monitoring rounds, we got a good picture of which bulb species attracts which type of insect.

From this research we have been able to compile a mixture of different types of bulb species that is very attractive to the green lacewings, parasitic wasp and parasitic fly throughout the entire period. These are natural fighters of the oak processionary moths. By applying this mixture in the vicinity of oak trees you contribute to the decline of the population of oak processionary moths.
